

The top of the page features a collage. On the left, there are orange line-art drawings of various robotic components like actuators, sensors, and grippers. In the center is the HEBI Robotics logo, which consists of the word 'HEBI' in a large, bold, orange, blocky font, with the word 'ROBOTICS' in a smaller, black, sans-serif font below it. To the right of the logo, there are three photographs: a close-up of a robotic gripper, a small tracked robot on a rocky surface, and a larger mobile robot with a long, flexible, white, hose-like arm.

HEBI ROBOTICS

We Make it Easy to Build Robots

The Old Way

Industrial robots require accommodation.
Mobile platforms and arms aren't adjustable.
Kinematics aren't reconfigurable.

vs.

Robots Built the HEBI Way

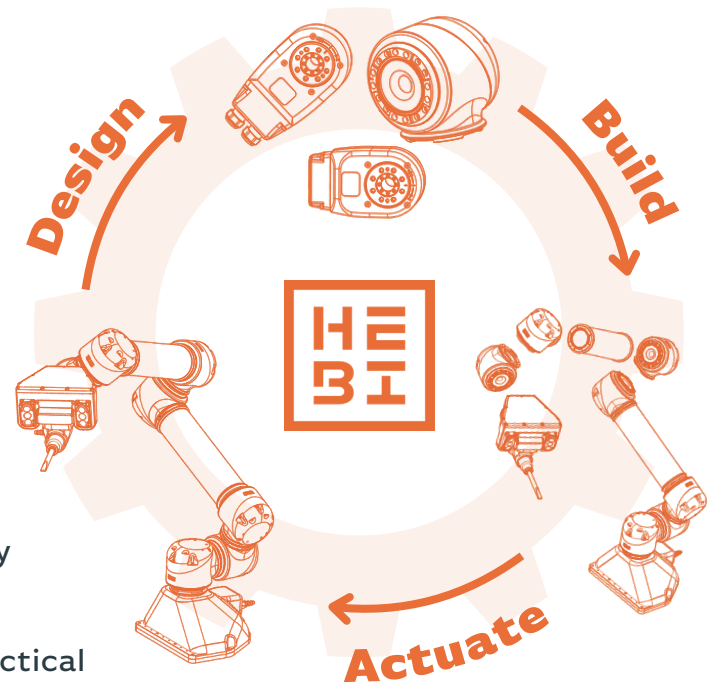

Robots designed to fit the task/workspace.
Fully-configurable hardware platforms.
Kinematics adjusted with a few clicks.

Historically, automation systems were restricted to pre-existing off the shelf robot arms and systems. HEBI removes these limitations.

From smart actuators, to arms and mobile platforms, to complete designs, HEBI offers a full range of robotic solutions. Combine flexible hardware with robust programmer-friendly software tools to get custom, reconfigurable kinematics fast.

HEBI hardware is designed to integrate with your preferred sensors, arms, and other 3rd party equipment. It's all about configurability and flexibility to match your needs to the right custom solution.

The HEBI Robotics platform makes it possible and practical to **create the robot that fits your job.**

Rapid Robot Development - **months not years**
Kinematic Flexibility - **bespoke + reconfigurable**
Flexible Platform - **classroom + factory + field**

Actuators

Smart actuators for a wide range of environments

R-Series

Series Elastic, designed to IP67

T-Series

Series Elastic, designed to IP65

H-Series

Strain Wave, designed to IP65

HEBI's lineup of actuators is constantly evolving with new options and configurations.

Hardware

Select from complete platforms or components that integrate 3rd-party hardware to build your perfect solution.

Software

APIs and intelligent tools to actuate and control your robot.

Get in touch at info@hebirobotics.com to discuss your application. HEBI offers both off the shelf and full custom solutions to fit your needs.

Accelerating the Future of Robotics
