

Auterion Suite is much more than a fleet management tool: it is where your entire workflow of missions, flights, assets and data are automatically collected, analyzed and presented in real time. Instantly access information transferred from your Auterion-powered vehicles to the cloud without any manual intervention.

Benefits

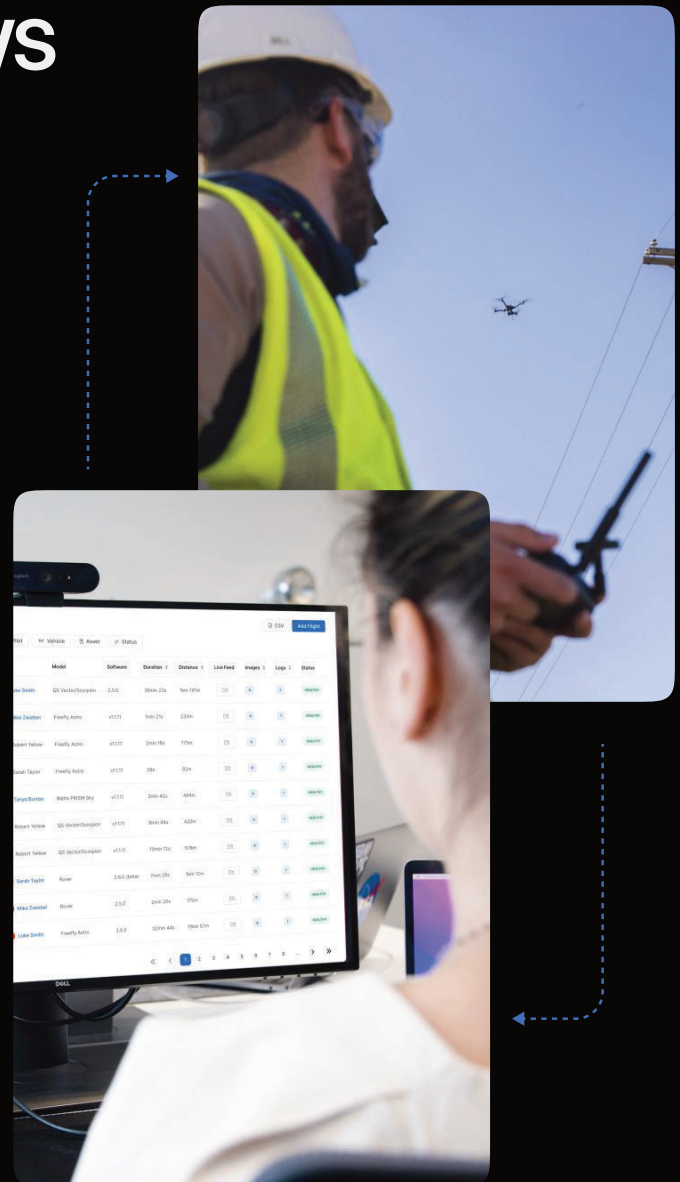

Automatic flight log data analysis enables continuous fleet health indication and predictive maintenance schedules.

Over-the-air software updates and standardized user experience reduce training efforts and speeds up team operations.

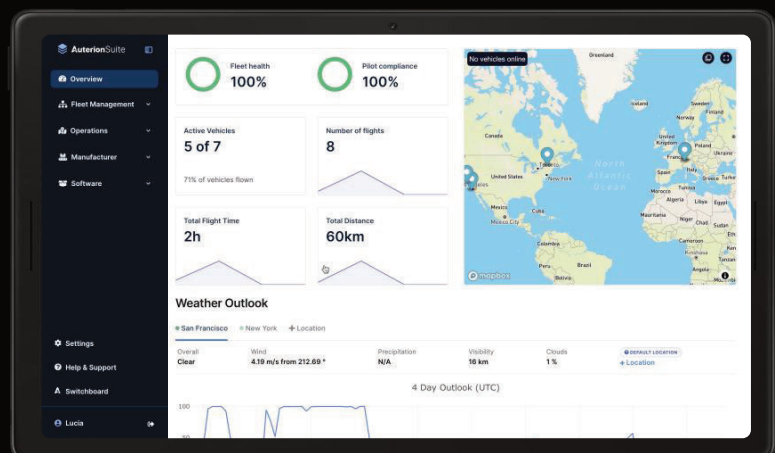

Real-time data transfer from the vehicle to the cloud enables automated end-to-end workflows and eliminates time-consuming manual processes.

Remote operations dashboard with live view of multiple vehicle enable quick decision making.

Automatic upload of all flight logs to the
Auterion Suite from every vehicle for every pilot.

Real-time data transfer from the vehicle to the cloud

Holistic and scalable fleet management

- ✓ Fleet overview and dashboard history
- ✓ Vehicles details
- ✓ Batteries and assets data
- ✓ Over the air software updates
- ✓ Flight logs upload and analysis
- ✓ App purchase and installation workflow

Real-time data for quick decision making

- ✓ Remote mission management
- ✓ Real-time video feed and telemetry data
- ✓ Automatic picture upload
- ✓ Access tools to achieve high levels of data accuracy (PPK and RTK)
- ✓ Cloud storage of documents and projects

Analysis reporting and predictive maintenance

- ✓ Fleet health
- ✓ Automatic flight logs checks
- ✓ Notification of potential issues
- ✓ Life cycle state of components and proactive measures
- ✓ Flights and pilots compliance
- ✓ Regulatory reports

Custom integrations and support

- ✓ API integrations
- ✓ Priority support
- ✓ Customer Success Manager
