

# Thermal testing

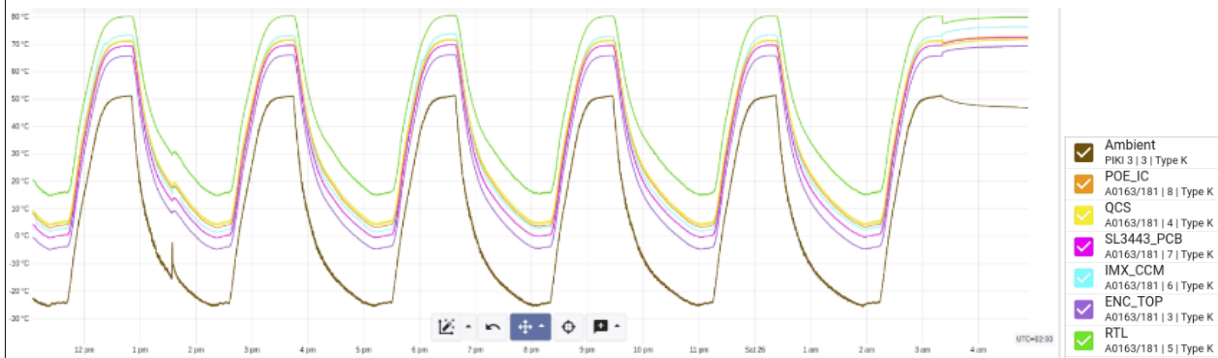

## Testing

| Thermal testing from -20°C to 50°C |                                                                                                                       |
|------------------------------------|-----------------------------------------------------------------------------------------------------------------------|
| OS:                                | 1.18.3                                                                                                                |
| Test script/command:               | python3 stress.py -cpu 8 -nn sustained_high_performance -cams -cama,c -eth 1000 -ip 10.12.160.229 -imu accel,gyro,mag |
| Test setup:                        | Thermal chamber                                                                                                       |

| Thermal testing - cycling |                                                                                                                       |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------|
| OS:                       | 1.18.3                                                                                                                |
| Test script/command:      | python3 stress.py -cpu 8 -nn sustained_high_performance -cams -cama,c -eth 1000 -ip 10.12.160.229 -imu accel,gyro,mag |
| Test setup:               | Thermal chamber                                                                                                       |

Results:

Pass/Fail: Pass
