

A platform connecting video, intelligence, and operations

FrontlineOS

The future of work, transcending time and space

Do these challenges sound familiar ?

Labor shortages are increasing

Many sites lack reliable connectivity

Full automation isn't realistic yet

Risky work and human-dependent decisions remain

Turn remote work into real-world operational power

Untapped talent becomes operational strength

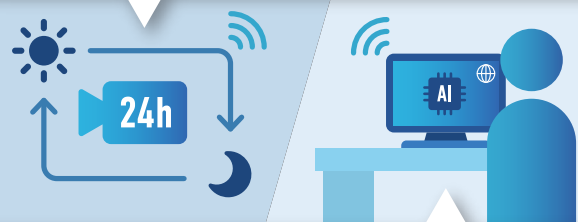

Even without being on site, skilled workers can contribute immediately through remote operation.

Ultra-low latency video enables confident, real-time control.

Operations that transcend time and space

Build a 24/7 safety and monitoring system from anywhere in the world.

AI continuously supports operations and communication.

Multiple sites, one operational desk

Reliable video streaming, even in constrained networks.

Collaborate with multiple sites—without travel.

Collaborate anywhere, achieve together

Remote expertise and safety checks reduce risk and reliance on individuals.

High-quality video enables precise situational awareness.

Three Steps to Adopt ——— Continuous, reliable operation is the starting point for on-site digital transformation.

Deploy a video streaming system

Integrate remote operation capabilities

Connect remote talent as an active workforce
