

SKYSPECS TECHNICAL ENABLED SERVICES

Financial Asset Management 2.0

SkySpecs – your trusted Financial Asset Management Partner – offering financial visibility, transparency, and accurate reporting across your projects throughout the full asset life cycle, from pre-development to construction and operation.

Financial Asset Management Services from SkySpecs Inc is an industry specific outsourced financial services offering based on industry best practices, industry experience and all managed via our Horizon Finance software package.

Horizon Finance is a cloud based financial asset management platform purpose built for the renewable energy sector. With automated workflows that address specific and unique pain points at the pre-development, construction, and operation stages of projects, Horizon Finance enables transparency that other platforms alone can't provide.

Financial Asset Management 2.0

Process

- Industry best practice
- Best-in-class process flows
- SOC 1 Compliance and error checking

Technology

- Industry specific platform
- Automated transactions and workflows
- Standardised API's

Industry Focus

- 100% focused on the renewable energy sector

As renewable energy portfolios become more and more diverse across multiple technologies and often across multiple jurisdictions, managing these portfolios from a financial perspective can become a challenge in itself. With experience across Wind, Solar and Battery Storage and with experience and a broad partner network in many renewable focused regions SkySpecs is your Financial Asset Management partner of choice.

We offer a full suite of Financial Services for renewable energy assets, including SPV administration, holding company administration and an array of additional services like banking and investor reports, audit management, and budget preparation.

Our Customers

SkySpecs Financial Asset Management Services works with a variety of companies across the renewable energy sector, but the two main segments who access our services the most are:

Technical Asset Managers

We look after the financial asset management in multiple jurisdictions allowing them to focus on technical aspects of the project - we integrate with their systems and design and implement scalable workflows, ensuring their clients receive a best-in-class experience.

IPPs & Funds

We allow their middle office / internal finance to scale better, providing better, more consistent data (for consumption into their BI Warehouse or in-house ERP systems) from SkySpecs and other FAM providers.

These customers trust us to manage their assets, report on their performance, and optimize their cash position so that they can scale with confidence.
