Customers

Our Approach

Introduction

Once we receive your request, our specialists will get in touch to review your setup, discuss ROI, and outline the next steps.

Concept to testing

After aligning on your needs, we'll develop and test your customized solution to ensure it's fully ready for setup at your facility.

Installation & service

After installation, we'll train your team to make adjustments using the Online Product Editor, helping you avoid any disruptions during updates or changes.

Here for the long haul

From day one and beyond, we're here to keep your operations running smoothly. Our Online Helpdesk is always available, offering fast remote support whenever you need it.

Your Pick & Place Partner

But what does it actually mean?

As your partner, we're not here to install and disappear—we **go all in**.

We're **flexible** and **committed** to designing a solution that **fits your unique facility**, and we'll stick around to smooth out any bumps along the way.

One-Stop Shop

By combining our **in-house developed software** with **industry-leading hardware**, we deliver a **complete solution** that allows you to automate in less than a day, scale as demand grows, and reach ROI fast.
