The ChronoGrill is a fully autonomous open-flame grill that cooks, temps, and ejects each patty with precision—ensuring every product is cooked to perfection and consistency. Additionally, every key performance metric, from cook times and throughput info to the exact temperature of every patty cooked, is logged and stored in the cloud. This allows clients to track performance in real time, ensure food safety compliance, and optimize kitchen efficiency. With ChronoGrill, labor-intensive grilling is a thing of the past—delivering unmatched speed, consistency, and cost savings with every cook cycle.

Flame Grilling on Autopilot. Your protein, your way, every time
