

BFD INSTALLATION

System Description:

The FulcrumAir LineFly™ is a lightweight, high-efficiency aerial robotic device designed to be slung under a FulcrumAir drone. It autonomously installs bird flight diverters (BFDs) at any specified interval.

Key Benefits:

Eliminates hazardous bucket truck or helicopter tasks

Robotic precision ensures accurate and quality installation

Dramatic productivity increases over traditional methods

No outages required, can install directly on 240kV energized conductors

Specifications:

Weight	PLP LineFly: 10.6 kg PLS LineFly: 10.2 kg
Capacity	PLP LineFly: 8 BFDs PLS LineFly: 12 BFDs
Compatible BFDs	Powerline Sentry Hawkeye 050 and 075 PLP BFDMS11135R, BFDMS11060R, BFDMS11134R, BFDMS3341R BFDMS3366R BFDMS10023R
Install rate	450 per day/crew on average
