

CONDUCTOR SPACER INSTALLATION & REMOVAL

System Description:

The FulcrumAir CSR-Twin™ is the world's safest and most efficient method for installing bundled conductor spacers. With the available SRT module, existing spacers can be removed and replaced with new PLP Twin Spacers all during the same operation.

CSR-Twin

Specifications:

Key Benefits:	Weight 80 lbs. (36 kg.)
 Replace conductor carts, significantly safer and more accurate than current method	Capacity Up to 9 spacers
 GPS, torque logging and camera systems for quality control and data collection	Compatible Spacer Full range of CUSHION-GRIP® and Twin Lok Spacers
 Performs removal and installation using the same tools and crew	Installation Capabilities Up to 200+ spacers per day with a 2 person crew, additional crews are easily added for more productivity
 Can operate while lines are energized up to and including 240kV as well as on all de-energized systems	Removal Capabilities Able to remove a variety of common conductor spacers
