

“You Click, We Deliver”

Why Delivery Robots?

Zero Emissions

Goodbye to air and noise pollution

Practical

Completes a delivery without hassle

Cost Friendly

Goodbye to salaries, petrol, insurance, etc.

Enjoyable

Great tool for marketing + fun to admire

Accurate

Avoids Human Mistakes

Safe

Package remains safe and untouched whilst delivery

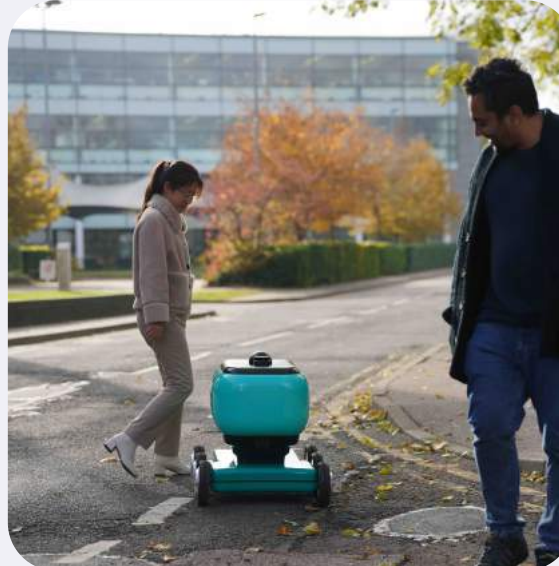

What makes peykBot Different?

Fully Modular Design

The first delivery robot that supports modular attachments and customisation

Intelligently Autonomous

A unique proprietary map free autonomous driving

All Terrain Design

Urban and offroad, no challenges faced

peykBot is fully customisable

First fully **modular** delivery robot with detachable attachments for various logistic needs.

Some other base features include:

- 6 Wheeled All Terrain Drive
- Heat, Dust and Water Resistant
- Personalised branding and colours
- Autonomous + Teleoperated Driving

Software in peykBot

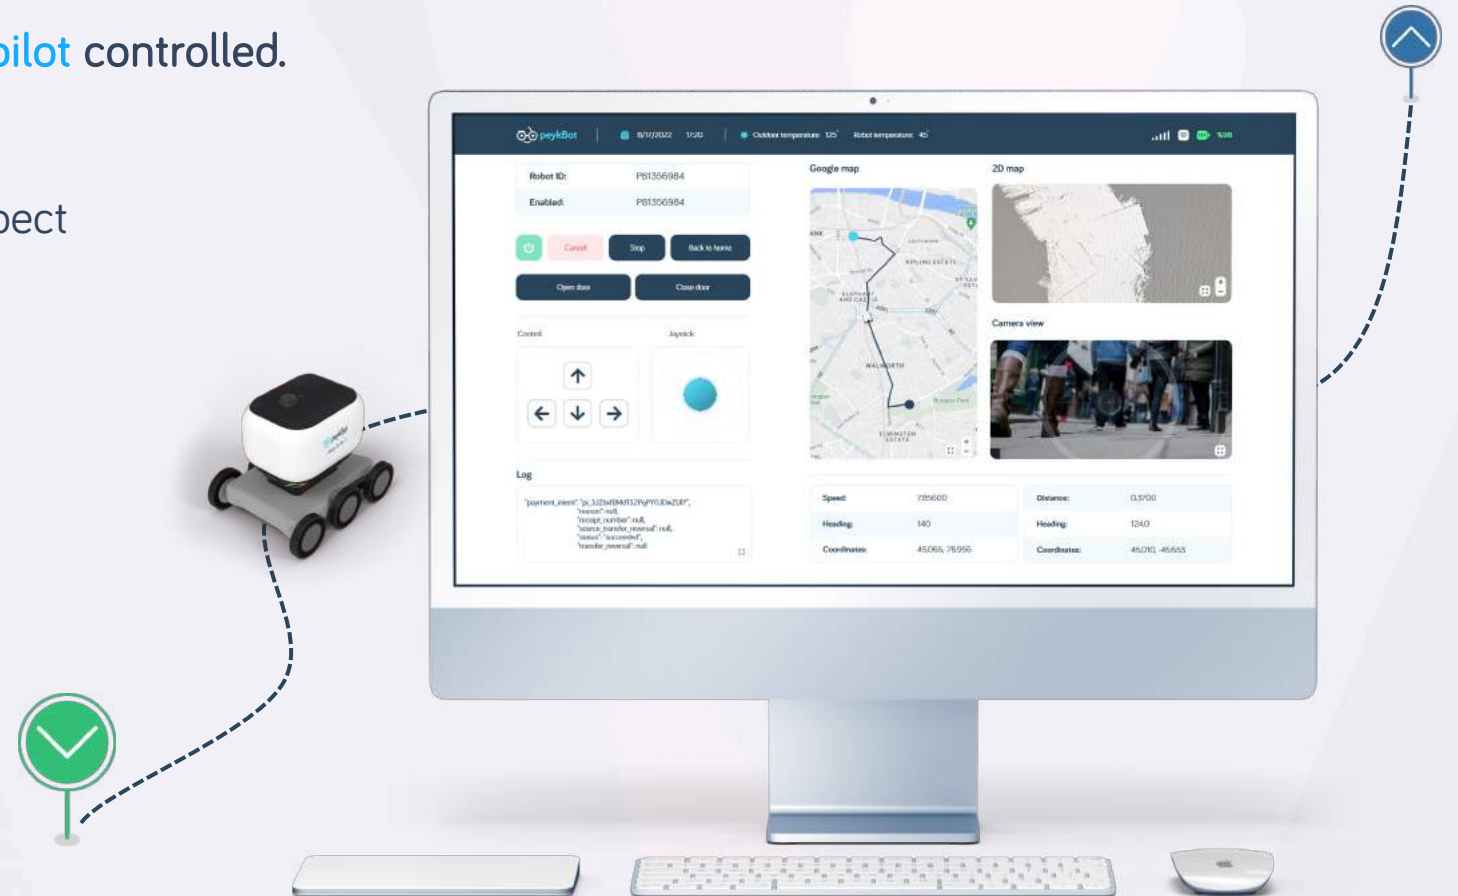

PeykBot can be **autonomous*** and **remotely pilot** controlled.

There is a dashboard that can control every aspect of the robot in live mode.

- Web Based teleoperation dashboard for live robot movement
- Live 360 Degree Camera Streaming
- Accurate GPS with Maps integration
- Emergency controls
- Playback of sounds on Robot

*Autonomous control can only be activated in select locations

Deliveries. Connected.

“The idea was not to make a delivery service.
It was to change the way people think towards deliveries”
-Founder, Salman
