

OTTO Fleet Manager

Experience next-level fleet management software

OTTO Fleet Manager is available in English, German, Dutch, Spanish, French and Japanese.

It's more than just software—it's the key to unlocking the full potential of your material handling operations. Achieve an entirely new level of performance and connectivity with the award-winning OTTO Fleet Manager. Whether you have one AMR or 100, confidently manage your material flow from any device or factory system, easily and securely.

TRAFFIC MANAGEMENT

Customize the way AMRs move through your facility with specific traffic rules like speed limits and exclusion zones.

AUTOMATIC ASSIGNMENTS

OTTO Fleet Manager intelligently matches AMRs to jobs based on battery levels, minimized idle time, and maximized utilization.

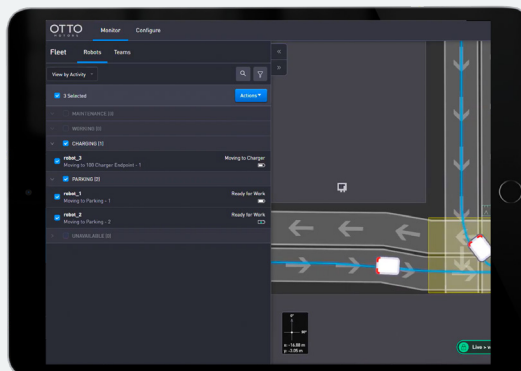

OPPORTUNITY CHARGING

Sit back as your AMRs maintain optimal battery levels all on their own by autonomously charging between jobs.

Effortlessly manage your AMR fleet

With an intuitive platform that's easy to use, you can begin autonomously moving your payloads on day one.

Once your workflows are set up, watch your fleet autonomously deliver a winning formula for throughput, whether you're operating with a few robots or scaling up to 100 AMRs across facilities up to 1,000,000 sq.ft. (or 92,000 sq.m.).

OTTO Fleet Manager increases average cycle time by intelligently pairing job requests with AMRs in real time.

As OTTO AMRs move through your facility, they continuously share information with each other to predict and avoid blockages, keeping your materials moving efficiently.

EXISTING SOFTWARE

Centrally connect to your business management systems, such as MES, ERP and WMS, via Open APIs.

EXISTING PLCS

OTTO communicates with your existing PLCs using OPC-UA—no additional sensors required.

SIMPLE TRIGGERS

Set a predefined schedule or dispatch tasks directly from your tablet, computer or button to get your fleet moving.

Handle integrations centrally

Seamlessly transfer materials throughout your facility by integrating OTTO AMRs with your existing business management systems. Centrally integrated with your facility, OTTO Fleet Manager makes it easy to dispatch tasks from anywhere on your factory floor.

LIVE DATA

Assess how your AMR fleet is performing—per mission, task or robot—at any time with live production data.

QUICK DIAGNOSIS

Proactively identify bottlenecks so you can resolve them before they become blockers.

FLOW OPTIMIZATION

Gather insights and trends to prove your ROI and make targeted enhancements to your material handling workflows.

Make data-driven decisions

Stay on top of your KPIs with access to real-time, reliable analytics of your fleet's performance. These interactive dashboards display vast amounts of data—like vehicle status, jobs in progress and historical trends—to help you enhance your material flow.
