

D2000S/E2000S/E3000 (D2000/E2000) Drone Maintenance Policy					
Serial number	Maintenance schedule	Maintenance period (Mileage)	Contents	Fees (RMB with tax)	Overdue explanation
1	1 st	3000KM	• Whole machine cleaning • Component checking • Error calibration • Maintenance records	Free	If the returned mileage exceeds the mileage specified in the maintenance period by 1000KM, it will be considered as giving up the free first maintenance and switching to paid first maintenance. Overdue payment: 2000.00RMB.
2	2 nd	8000KM	• Whole machine cleaning • Component checking • Wearing parts replacement • All motors replacement • Error calibration • Maintenance records	3000	If the returned mileage exceeds the specified period by 1000KM, the secondary maintenance fee will be increased. Overdue fee: increase by 10%.
3	3 rd	12000KM	• Whole machine cleaning • Component checking • Wearing parts replacement • Error calibration • Maintenance records	2000	If the returned mileage exceeds the specified period by 1000KM, the third maintenance fee will be increased. Overdue fee: increase by 10%.
4	4 th	16000KM	• Whole machine cleaning • Component checking • Wearing parts replacement • All motors replacement • Error calibration • Maintenance records	3000	If the returned mileage exceeds the specified period by 1000KM, the fourth maintenance fee will be increased. Overdue fee: increase by 10%.
Notes	• The D2000 drone requires a maintenance service every 4000KM starting from the second maintenance period.				

	at even numbered maintenance period, motor replacements are mandatory. • In principle, thanks to the replacements, cleanings, inspections, and calibrations actions at each maintenance period, the D2000 supports continuous maintenance without serious accidents. And the overdue fee increase rate for each ladder is 10%. • It is strongly recommended to adhere to the scheduled maintenance from a safety perspective, avoiding delays or skipping maintenance period. even numbered maintenance period cannot be skipped (e.g. , if a drone reaches 15000km in flight distance or has a distance of 10000km or less, and the usage exceeds 3 years, the second maintenance period standard must be executed). • The maintenance rules and costs for maintenance period four (excluding) and above are subject to the same principles and rotational implementation. • According to the policy requirements of the official insurance cooperation institution, drones that renew their insurance must complete basic maintenance on time and provide a maintenance record. • According to the policy requirements of the official insurance cooperation institution, drones that do not adhere to the regular maintenance schedule may not be able to enjoy related insurance benefits depending on the cause of the accident. please pay attention to the importance of maintenance for the drone and its payload assets.
