

iA NEXiA

Informed by 25-plus years of pharmacy innovation, iA's proprietary software platform for pharmacy, NEXiA, is the nexus of people, process, and technology, providing comprehensive and flexible fulfillment throughout the entire prescription lifecycle.

NEXiA integrates with third-party platforms including pharmacy management, e-commerce, inventory management, specialty care, queueing, and shipping.

With comprehensive capabilities, NEXiA drives omnichannel pharmacy fulfillment — from prescription acceptance to quality verification and delivery.

NEXiA Key Benefits:

Inventory Management

Seamlessly manages inventory with prioritization and trend forecasting.

Omnichannel Delivery

Creates the opportunity for pharmacies to more easily and efficiently offer patients choice on prescription delivery.

Bi-directional Software

700 configuration parameters and 70 existing bidirectional interfaces that can integrate with third-party hardware.

Production Control

Intelligent production control from adjudication through distribution.

Workflow Processes

Ability to meet your unique operational needs with flexible configurations and dynamic routing.

Unleash the full potential of pharmacy
