

Accelerate Universal Robots deployments with Precision Cobotics EZ IO-Link URCap

Seamlessly integrate IO-Link technology with Universal Robots for device control and flexibility.

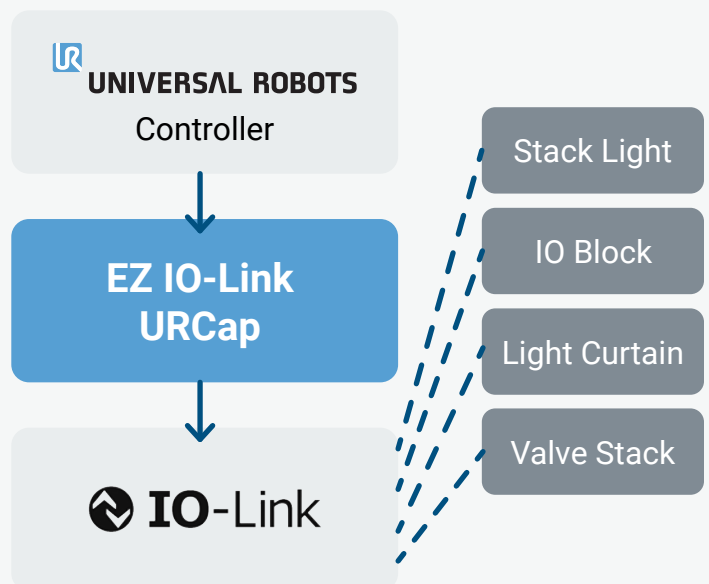

Making it easier than ever to automate with Collaborative Robots

- Quick and cost-effective deployment
- Streamline device expansion and replacement
- Flexibility to integrate diverse devices
- Reduced programming time
- Simplify hardware connections

Configure IO directly from Universal Robot's Teach Pendant

Common IO-Link Applications	Precision Cobotics EZ IO-Link UR Cap	Popular Devices for UR Applications
Stack Light Control	IO-Link Write 	
Operator Display	IO-Link Write 	
Vacuum Control	IO-Link Write 	

Connect devices using the EZ IO-Link URCap:

					
I/O Modules	Grippers	Pneumatic Valves	Vacuum Control	Measurement Sensors	Stack Lights
