

PDT 7000 2K Dispensing Gun

The PDT 7000 2K Dispensing Gun is perfect for many automated or manual applications of most two part materials, providing a clean, precise bead of material. The balanced spool design draws back to close the valves, using a pressurized seal for extreme heavy-duty applications. The compact, aluminum gun is perfect for robotic applications, or for manual operations when fitted with our electric-operated trigger handle. The gun easily adapts to a wide variety of dispensing tips as well.

FEATURES:

- Works with most 2-component formulations
- Adapts to various disposable mixers
- Draw back design prevents drips
- 5/16" diameter spool provides high flow rate
- TIN coated spool extends product life
- #6 SAE ports for material inlets
- Divorced air cylinder keeps actuator in tact
- Wet gasket for longer lasting seal
- Lightweight aluminum construction
- Hardened Helicoil inserts for long thread life
- Proven design, quality-checked build
- Reliable post-sale service

OPTIONS:

- Air-operated trigger handle
- Electric-operated trigger handle
- Concentric flow marrying blocks available
- Flushable or non-flush marrying block

SPECIFICATIONS:

- Rated @ 3000 psi working pressure
- Air-operated, balanced spool design
- Compact size: 2" x 2" x 8"

WHY PDT?

- Automation and dispensing expertise to fully support your project and streamline transactions.
- Both turnkey and custom solutions to help you improve manufacturing productivity.
- Established quality procedures ensure superior products that keep customers coming back.
- Personal, attentive customer service, competitive pricing, and ongoing product support.
